

# Bank of america solar container

## Overview

---

This year, the bank plans to install solar panels at 15 financial centers and on 10 ATMs. Over the next three years, the company is expected to add more than 60 solar installations across its operations. Bank of America today announced a 15-year, 160-megawatt agreement with Constellation, a clean energy company, to purchase power and project-specific renewable energy certificates (RECs). This agreement will help Bank of America power approximately 17 percent of its global electricity consumption. A Summit Ridge Energy 3 MW solar project located in Delmar, MD. (Photo Credit: Ben Paul Morris) ARLINGTON, VA [September 9, 2025] – Summit Ridge Energy, the nation’s leading commercial solar company, today announced the closing of a \$305 million senior secured credit facility with Bank of America. Through its partnership with GRID Alternatives, a nonprofit organization dedicated to expanding solar access to underserved communities, Bank of America recently participated in two workdays in National City, CA and San Jose, CA. These events not only brought renewable energy to deserving families. Bank of America is expanding its investments in solar energy, installing solar panels across multiple locations through its Onsite Solar Initiative. The addition of solar power at financial centers, ATMs, office locations and other operational buildings will reduce energy costs for the bank and.
