

# Construction of monrovia solar container industrial park begins

## Overview

---

Monrovia moved forward with a purchase/lease agreement with ING for a solar energy and storage installation at the Mountain Avenue Reservoir, the city's backup emergency power site, according to hosts' Dec. 16 recap. The Monrovia City Council on Dec. 16 introduced an ordinance to adopt the 2025 edition of the California Building Standards Code (Title 24) with a set of local administrative and fire-hardening amendments permitted under AB 130, and set a public hearing for Jan. 20, 2026. Greg, the city's Building. Background of the Monrovia Industrial Park (MIP) The Monrovia Industrial Park was established by an Act of the National Legislature in February 1966, which authorized the expropriation of 1,112 acres of land between the Mesurado River Bridge and the Gardnersville access road for the development of. The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now account for approximately 35% of all new utility-scale storage deployments worldwide. North America leads with 40% market. Monrovia moved forward with a purchase/lease agreement with ING for a solar energy and storage installation at the Mountain Avenue Reservoir, the city's backup emergency power site, according to hosts' Dec. 16 recap. Hosts described the project as a rooftop solar field on the covered reservoir near. Each month, we track solar projects in the state and update our list of the largest solar farms in California. As of January 2026, there are 928 utility-scale solar farms in California, according to Cleanview's project tracker. Their total operating capacity is 24,077 MW. In 2025, there were 48. Enter Monrovia Energy Storage Industrial Park - California's answer to the modern energy puzzle. This 300-acre facility isn't just another industrial complex; it's the equivalent of a giant "charging bank" for California's power grid, storing enough electricity to power 150,000 homes during peak.
