

# **Eta2825 solar container time**

## Overview

---

Central hours; central minutes; small seconds at 6:00 (base configuration)  
Regulator style with central minutes; hours subdial near 10:00; small seconds subdial near 4:30 Offset hours and minutes subdial around 1:00-2:00; small seconds around 8:00. The ETA caliber 2825-2 is an automatic movement with a variety of configurations depending on the watch. This Swiss made caliber has 25 jewels and a power reserve of about 38 hours. It is based on the 2824-2 framework. The 2825-2 can be found in various Swatch Group watches such as Hamilton and. Self-winding on both directions, manual winding possible. Indirect small seconds with hacking, date with quickset at the middle crown position Date, Day, Month. : Date. Variation of ETA 2824 with small seconds. The placement of the axis of the hands can vary; one of the features of this movement is the option to place the gears for these at different positions. This is achieved through a module pre-set with different holes to mount these gears; it increases the. ETA 2825-2 comes in , standard, elaborate, top grade and Chronometer grade. I have a Chance to buy this at a discount, have asked the seller for a pic that balance can be seen in, plus numbers on the back plate so I can confirm genuineness and the grade. This movement is produced by ETA. The type of watch mechanism is mechanic automatic and is powered by the movement of your wrist. This movement has a power reserve of 42 hours. The display of this movement is Analog. This caliber first appeared in 2013. Taking the popular 2824-2 as a base, this movement uses a clever module which allows for the seconds hands to be fitted at 12 different locations. The hour and minute hand can also be fitted at the center, giving 13 different options for these two hands. This.
