

# Future solar container batteries

## Future solar container batteries

### std::future::get

The get member function waits (by calling wait ()) until the shared state is ready, then retrieves the value stored in the shared state (if any). Right after calling this function, valid () is false. ...

### What is a Future and how do I use it?

A future represents the result of an asynchronous operation, and can have two states: uncompleted or completed. Most likely, as you aren't doing this just for fun, you actually need the ...

### std::future::wait\_for

If the future is the result of a call to std::async that used lazy evaluation, this function returns immediately without waiting. This function may block for longer than timeout\_duration due to ...

### std::future::wait\_until

wait\_until waits for a result to become available. It blocks until specified timeout\_time has been reached or the result becomes available, whichever comes first. The return value indicates why ...

### Pandas replace and downcasting deprecation since version 2.2.0

To opt-in to the future behavior, set `pd.set_option('future.no_silent_downcasting', True)` `0 1 1 0 2 2 3 1 dtype: int64` If I understand the warning correctly, the object dtype is "downcast" to ...

### How can one await a result of a boxed future?

impl Future for Box where F: Unpin + Future + ?Sized, Boxed futures only implement the Future trait when the future inside the Box implements Unpin. Since your function ...

### Mockito is currently self-attaching to enable the inline-mock-maker

I get this warning while testing in Spring Boot: Mockito is currently self-attaching to enable the inline-mock-maker. This will no longer work in future releases of the JDK. Please add ...

## What is `__future__` in Python used for and how/when to use it, and ...

A future statement is a directive to the compiler that a particular module should be compiled using syntax or semantics that will be available in a specified future release of Python. The ...
