

# Georgia new solar container plant operation information

## Overview

---

The first industrial solar power plant in Georgia will be put into operation from the end of October this year. According to the Green Energy company, a solar power plant with an installed capacity of 2.4 megawatts will be built in Kaspi and will be connected to the "Energopro" network. As of January 2026, there are 18 solar projects in development in Georgia, according to Cleanview's project tracker. Their total planned capacity is 3,987 MW. Of these, 5 solar projects are expected to come online within the next 12 months. Click any of the links below to jump to a specific project.

**Largest solar cell manufacturing facility in North America to expand and upgrade Production expected to begin early 2024**  
Norcross, Ga. – October 11, 2023 – Suniva, Inc., the largest U.S. manufacturer of high-efficiency monocrystalline silicon solar cells today announced the upgrade, expansion and. This report summarises IRENA analysis to identify favourable zones in Georgia for utility-scale solar PV and onshore wind projects, and their associated techno-economic parameters. In today's dynamic energy landscape, harnessing sustainable power sources has become more critical than ever. Among. The first industrial solar power plant in Georgia will be put into operation from the end of October this year. According to the Green Energy company, a solar power plant with an installed capacity of 2.4 megawatts will be built in Kaspi and will be connected to the "Energopro" network. The. In a landmark move for the American renewable energy sector, Georgia-based Qcells is set to open the only fully integrated ingot-to-module photovoltaic (PV) production plant in the United States. This development, centered in Cartersville, Georgia, marks a major shift in domestic solar. The US-based EPC and solar technology firm has announced the commissioning of a 24 MWp solar plant in Georgia, dedicated exclusively to on-site power for the fertiliser and chemical sectors. The solar plant will supply all its energy to JSC Rustavi Azot, a major fertiliser and industrial chemicals.
