Graphene solar container plate

Solar

Features overview

GrapheneOS is a private and secure mobile operating system with great functionality and usability. It starts from the strong baseline of the Android Open Source Project (AOSP) and takes great care to ...

Frequently Asked Questions , GrapheneOS

This page contains answers to frequently asked questions about GrapheneOS. It's not an overview of the project or a list of interesting topics about GrapheneOS. Many of the answers would be nearly the ...

Build , GrapheneOS

These are all fully supported production-ready targets supporting all the baseline security features and receiving full monthly security updates covering all firmware, kernel drivers, driver libraries / services ...

Source code

Source code for GrapheneOS. The operating system has a unified build system, but some components like Chromium are too complex to fit into it so they're included as prebuilts instead of porting them to ...
