That's the Monrovia Shared Energy Storage Project in action - and it's rewriting the rules of how communities handle electricity. Forget those clunky power plants of yesteryear;. Traditional power grids weren't built for today's climate extremes and renewable energy fluctuations. You know how people talk about "too much solar"?

Turns out, storing that excess energy effectively is the real challenge. Lithium-ion batteries - the current go-to solution - have limitations. Monrovia moved forward with a purchase/lease agreement with ING for a solar energy and storage installation at the Mountain Avenue Reservoir, the city's backup emergency power site, according to hosts' Dec. 16 recap. Hosts described the project as a rooftop solar field on the covered reservoir near. A California sunset glows over Monrovia while 500 megawatt-hours of stored solar energy quietly feeds the local grid. That's the Monrovia Shared Energy Storage Project in action - and it's rewriting the rules of how communities handle electricity. [pdf] Housed at Kaiser's Ontario Medical Center in. The Solarcontainer represents a grid-independent solution as a mobile solar plant. Especially in remote areas it can guarantee a stable energy supply or support or almost replace a public grid with strong power fluctuations, as well as diesel generators that are used. What is a mobile solar PV.
