Pt5000 movement solar container

PT5000 long-term reliability! : r/ChineseWatches

Trying to regulate the movement is almost never the answer because the first rule of regulation is that the movement needs to be properly lubricated. So if you want long term performance have the ...

Understanding the PT5000 Movement: Precision Meets Value

Designed and manufactured in China, the PT5000 offers a compelling alternative to established Swiss calibres like the ETA 2824-2 or Sellita SW200, delivering impressive accuracy and ...

A Comparative Analysis of the PT5000 Movement: A Rising Force in ...

The PT5000: An Eastern Contender The PT5000 is an automatic movement, offering a power reserve of 38 hours. It measures 25.60mm in diameter and is 4.60mm thick. It includes 25 ...

PT5000 Movement, what's been your experience so far?

I have 2 watches with the PT5000 movement, both from San Martin and both have performed very well since buying them, a little over a year now. However, while shopping during the 11.11

sale, I am ...

Feedback & experiences with the PT5000 movement?

Looks like more and more watches are coming out, equipped with the ShanCheng PT5000 asian movement. Afaik, it is dimensionally equivalent to the eta 2824-2, but.. how is the build ...

Is PT5000 reliable ? : r/ChineseWatches

The PT5000 can be regulated to receive chronometer status, meaning it can pass a large number of accuracy tests. Some manufacturers have obtained this, but SM is not one of them.

A Comparative Analysis of the PT5000 Movement: A Rising Force in ...

One such contender is the PT5000, produced by Hong Kong's H.K. Precision Technology (HKPT), which has gained attention in the watch community for its impressive performance and ...

Is a PT5000 a good movement? , WatchUSeek Watch Forums

I generally only trust Sea-Gull for Chinese movements. PT5000 hasn't been around long enough to truly know how long term reliable they are. Personally, I'd rather have Miyota 9xxx for a bit ...

PT5000 movement. Your experiences? : r/ChineseWatches

The PT5000 can be grainy and puts up resistance when screwing the crown back in depending on how much the watch is wound. But this is the case with pretty much most of the ETA 2824-2 and sellita ...

Here's one good reason to choose the PT5000 movement when you ...

Workhorse movement that isn't susceptible to winding and easily customizable when I get slightly bored of the watch and want a new watch look without spending new watch money.

DESPERATELY need help! Is this PT5000 bad, or is it just me?

I bought a Proxima watch with a PT5000 movement, and after 6 months, the hand winding has become terribly difficult. It's almost impossible to turn smoothly as it gets stuck, jerks, and is extremely sluggish.

PT5000 Movement Question , Replica Watch Info

I just received a new PT5000 movement for a future build, it came with a type of flange, what is the flange used for ? Iv seen that flange before on my NH34 GMT build, but the PT5000 is a ...
