

# **Solar container battery 4g positioning module**

## Overview

---

solar powered magnetic 4G gps tracker: temperature monitoring, RFID, TPMS. It has been designed for challenging conditions such as trailers, containers, boxcars, mining equipments, stationary and remote asset monitoring where permanent DC power supply is not always available. This guide outlines what engineers and system designers need to know when integrating solar and battery power with 4G modules. 4G modules have varying power needs depending on operational states: Idle/Standby: Minimal consumption, often under 10mA. Data Transmission: Can spike up to 2A or more. solar powered magnetic 4G gps tracker: temperature monitoring, RFID, TPMS. It has been designed for challenging conditions such as trailers, containers, boxcars, mining equipments, stationary and remote asset monitoring where permanent DC power supply is not always available. This robust all in one. -Professional web tracking platform: movement history replay back, excel report, working status, battery alert. Tech Specification: If you like our products, please share with your friends,thanks. Taxis are equipped with the T633L tracker, magnetic card reader, taximeter, and camera. These taxis can only be driven by authorized drivers. In case of emergency, the government monitoring center can pinpoint the location quickly and efficiently, and take immediate action. The system connected. # Precise positioning with accuracy of 5 meters. # GPS+BDS location mode. # Wide work voltage range: DC3.4V~4.5V. # Strong magnet or lock by bracket. # Tracked by: SMS, Mobile APP, Web platform. 1.Tear down alarm with light sensor. 3. Over speed alarm. 4. Geo-fence. 5.Vibration alarm. 6. Low power. Summary: Discover how integrating 4G positioning modules into energy storage batteries transforms industries like renewable energy and logistics. Learn about real-time monitoring, enhanced security, and global market trends driving this innovation. Why 4G Positioning Modules Matter for Energy.

- Efficient Higher Revenue**
  - Max. Efficiency 97.5%
  - Max. PV Input Voltage 600V
  - 100% Peak Output Power
  - 2-MPP Trackers, 100% DC Input Dimming
  - Max. PV Input Current 20A, Compatible with High-Power Modules
- Intelligent Simple O&M**
  - IP66 Protection Degree: support outdoor installation
  - Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
  - DC AC Input & Output: prevent lightning damage
  - Battery Reverse Connection Protection
- Flexible Abundant Configuration**
  - Plug & Play, EPT Switching Under 20ms
  - Compatible with Lead-acid and Lithium Batteries
  - Max. 6 Units Inverter Parallel
  - ARC Function (Optional): when an arc fault is detected the inverter immediately stops operation
