

# **Solar container support details**

## Overview

---

Solar support structure for adding solar panels to top of 20ft shipping container. Includes support legs, rails and Pro Solar module clamps. Support structure for for installation on 20 ft CONEX shipping container. All modules face same direction. This system can accept six-twelve solar modules, of either 60 or 72 cell format (modules not included). Distance between leg foundations is 8 ft. Five rafter structures are included for. We make mobile solar containers easy to transport, install and use. Make the next step towards renewable energy with our Solarcontainer! The challenges of our time are more present than ever. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. Shipping containers are often used as remote offices, workshops or data shelters on construction sites, farms, and emergency zones. When the grid is hundreds of feet away (or non-existent), a self-contained power solution is ideal. For instance, specialized units like the LZY-MS1 Sliding Mobile. Are you considering mounting solar panels on a shipping container and wondering what to keep in mind?

This article offers a concise overview to help you understand the key considerations and shows you some real-world examples. Can you put solar panels on a shipping container roof?

Absolutely!. We are proud to partner with one of the leading providers of factory installed solar options for shipping containers. Learn more about the product and inquire below. Who is Stealth Power?

Stealth Power provides fleet electrification and off grid solar solutions for customers of all kinds. They have. This product is the support rafters and leg mounts sized for fifteen 60 or 72 cell modules. Design support one rows of 12 modules in portrait when placed on a single width container structure. Package include 9 support rafters, 18 leg footings for corner-mount to standard shipping container, cross.
