That changed in 2023 with the publication of NFPA 70B, Standard for Electric Equipment Maintenance, as a consensus standard. 70B has been the NFPA's primary document covering electrical equipment maintenance since 1975, but previously was a "recommended practice." That changed in 2023 with the publication of NFPA 70B, Standard for Electric Equipment Maintenance, as a consensus standard. 70B has been the NFPA's primary document covering electrical equipment maintenance since 1975, but previously was a "recommended practice." Now it is a "standard" meaning. — The American National Standards Institute (ANSI) has officially approved two new American National Standards developed by the Solar Energy Industries Association (SEIA) on consumer protection and operations and maintenance for solar and storage projects. These newly approved standards, ANSI/SEIA. The two ANSI-accredited standards provide guidance on ethical sales and contracting practices, and on maintaining solar and storage systems to maximize performance, longevity and safety. The American National Standards Institute (ANSI) approved two new standards developed by Solar Energy Industries. The Solar Energy Industries Association (SEIA) has announced the official approval of two new standards aimed at enhancing consumer protection and improving operations and maintenance (O&M) practices within the U.S. solar and energy storage sectors. These standards, ANSI/SEIA 401 and ANSI/SEIA 301. The Solar Energy Industries Association (SEIA) has recently received official approval from the American National Standards Institute (ANSI) for two pivotal new standards aimed at enhancing consumer protection and operational practices within the solar and storage sectors. These standards, known as. As utility-scale solar and battery energy storage systems (BESS) continue to proliferate across the energy landscape, establishing a robust, standardized O&M program has become essential. Effective O&M not only ensures performance and safety, but also extends asset lifespan, minimizes downtime, and.
