

# **The vacuum solar container box has oil**

## Overview

---

The oil will live in two fifty gallon tanks. We will call them ot1 and ot2. They will be connected near the top with an over flow tube. SO each tank will hold up to approximately forty gallons of oil. But the system will only have fifty gallons of oil in it. It will be 10X16 inside will be a system that uses evacuated tube (vacuum tubes) solar collector, to heat oil. The oil will live in two fifty gallon tanks. We will call them ot1 and ot2. They will be connected near the top with an over flow tube. SO each tank will hold up to approximately forty. The solar collector is the engine of any solar water heater. Solar vacuum tubes have always been the most efficient solar power production systems for high temperature applications or cold weather but are more expensive than other flat panel system or pool panel collectors. However, the growing. A solar water heater tank is a familiar solar energy container that can be seen on the roofs of many homes. It is mainly composed of a collector and a water storage tank. The collector is usually a black metal plate or pipe that can absorb the heat from the sun and transfer it to the water flowing. Question worth asking: Would you let your car run for 5 years without an oil change?

Not on your life. So why would you hope that solar gear would run forever without a checkup?

Unlike diesel generators, which require regular oil changes, fuel topping off, and part replacement, solar containers. But the oil shortages of the '70s became the oil glut of the '80s, and the tax incentives that helped give birth to the solar industry disappeared. Subsequently, the industry suffered a quick and quiet death, a fact that hit home for me during a tour of a water-heater manufacturing facility in the. A solar vacuum tube is a type of solar thermal collector. It is most commonly used to generate hot water for using in heating your house, heating your pool, or to provide hot water for direct use in your faucets and shower. When you install a solar vacuum tube system for your house, it can either.
